Coronavirus Disease 2019 (COVID-19) 
Frequently Asked Questions About Testing

Updated July 1, 2020

During this time of anticipated large demand on the health care delivery system, you are asked to avoid unscheduled visits to your health care provider. It is important to call ahead.

People who are mildly ill should not go to emergency departments. Mildly ill people should stay home and contact their provider by phone for guidance.

The Basics

Should I get a test?
Everyone is encouraged to get a test – even those who do not exhibit symptoms or have a particular reason to suspect exposure.

Where am I able to be tested? Whom do I contact?
There are more than 200 testing sites available throughout Maryland. Location, contact, and scheduling information for many of the COVID-19 test sites in Maryland can be found at https://coronavirus.maryland.gov/pages/symptoms-testing. Patients are encouraged to contact the site where they plan to be tested to verify that site’s appointment procedures and other scheduling requirements.

If you plan to test at a site listing “CRISP” as the point of contact (this includes many drive-thru testing sites), contact your health care provider and ask for your test order to be sent to CRISP. After the order is submitted, you will receive an email or text with an order confirmation code and instructions to schedule your appointment. After you schedule your appointment, you will receive a second email or text message confirming the appointment.

What does the test consist of? What is the process?
Generally, the test involves a swab (“q-tip”) inserted into the back of the patient's nostrils. Most patients report minor, temporary discomfort at most.
How long does it take to receive results? How do people who are tested get their results?
Generally, the results will be available within two to five days, depending on laboratory testing demands and resources. In most cases, you will have the option to be contacted with your test results via text message or phone call or to retrieve your results through an online patient portal.

Will I have to pay for the COVID-19 test?
COVID-19 testing will be provided to patients at no out-of-pocket cost.

Will my insurance cover treatment if I test positive for COVID-19?
Health insurance plans cover medically necessary treatment for disease, but the treatment may be subject to deductibles, copayments, and coinsurance. You will need to pay those amounts, even if the care is covered. If you have a limited benefits plan, there may be additional restrictions on what is covered.

If I do have COVID-19, what happens?
The vast majority of people recover from this disease in one to two weeks. Most people will have mild to moderate symptoms and will be advised to recover at home and isolate themselves from others. Any individual whose symptoms get worse should call a health care provider.

After The Test

What do I do while waiting for my results?
Stay at home and self-isolate. Frequently wash your hands with soap and water for at least 20 seconds. Limit contact with pets and animals; wear a face covering when you are around others; clean and disinfect frequently touched objects and surfaces. Monitor your symptoms. If your symptoms get worse, please call your health care provider’s office. If you are having a medical emergency, such as difficulty breathing, call 911. Tell the 911 operator that you were tested for COVID-19 and are waiting for results.

What do I do if my test results are positive for COVID-19?
If you test positive, you should self-isolate at home for ten days after your symptoms started or three days after your last fever, whichever is longer, and if your symptoms are improved. Continue to practice good hygiene, including frequent and thorough hand washing, disinfecting “high-touch” surfaces, and frequently washing clothing and bedding. Limit contact with pets and animals. Practice physical distancing within the home and wear a mask around other people.

Will my positive COVID-19 test results be reported to public health entities?
Yes. Positive COVID-19 test results will be reported to the appropriate public health agency in accordance with applicable Maryland laws and regulations.
When can I be around others after having COVID-19?
Talk to your health care provider especially if you have a high-risk underlying health condition or if you are 65 years and older. You may need to stay away from other people longer.

Most people can follow the CDC’s three conditions before being around others:
1. It has been at least 10 days since you first felt sick, **AND**
2. It has been at least 3 days since you last had a fever without taking fever-reducing medicine, **AND**
3. All your other COVID-19 symptoms have gotten better.

When around others, remember to keep six feet away and wear a face covering.

**State and Local Government Drive-Thru Sites**

The Maryland Department of Health, the Maryland Department of Transportation, and other state and local partners have converted select Vehicle Emissions Inspection Program (VEIP) stations and other facilities into drive-thru COVID-19 testing sites in various locations across the state. Several private organizations, including national pharmacy chains, offer drive-thru testing in Maryland. The information here applies to state and local government-sponsored drive-thru sites only.

**How do I make an appointment at a drive-thru site?**
Location, contact, and scheduling information for many of the drive-thru COVID-19 testing sites in Maryland can be found at [https://coronavirus.maryland.gov/pages/symptoms-testing](https://coronavirus.maryland.gov/pages/symptoms-testing). Patients are encouraged to contact the site where they plan to be tested to verify that site’s appointment procedures and other scheduling requirements.

**Will I be required to exit my car when I arrive at the drive-thru testing site?**
No. All visitors will remain in their vehicles upon arrival at the drive-thru testing site. Windows should remain up until it is time to be tested. *In the event of inclement weather, please remain in your car and await further instructions from testing-site personnel.*

**What type of identification will be required on arrival at the drive-thru testing site?**
Proof of identification may include a photo identification/driver’s license, United States passport, or Social Security card. Only patients 18 years and older will need to provide identification.

**How long will I have to wait in line?**
If you have an appointment, you are encouraged to arrive at the testing site 15 minutes ahead of their scheduled time. This will ensure efficient movement through each step of the process.
