

Novel Coronavirus (2019-nCoV) Outbreak

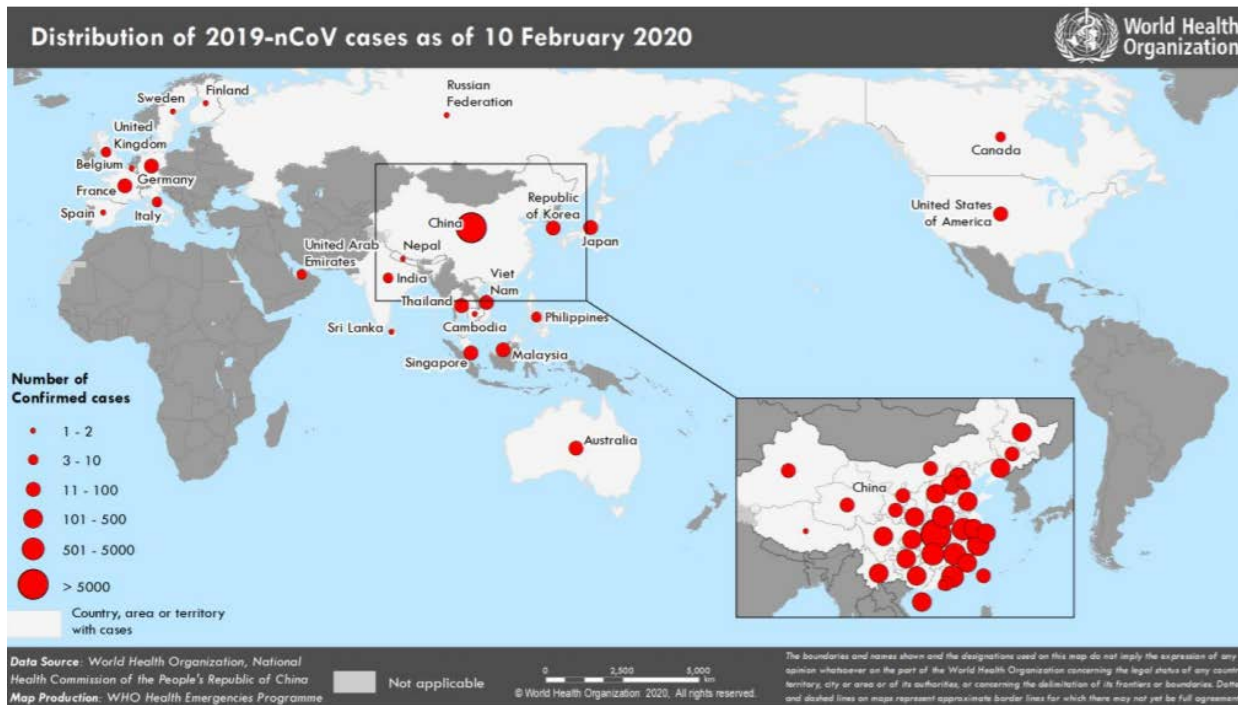

Infectious Disease Epidemiology and Outbreak Response Bureau

February 11, 2020

The information in this presentation is current as of February 11, 2020, unless otherwise noted, and subject to change.

Novel Coronavirus(2019-nCoV) Situation Report – 21

Data as reported by 10 February 2020*

SITUATION IN NUMBERS total and new cases in last 24 hours

Globally
40 554 confirmed (3085 new)

China
40 235 confirmed (3073 new)
6484 severe (296 new)
909 deaths (97 new)

Outside of China
319 confirmed (12 new)
24 countries
1 death

WHO RISK ASSESSMENT

China	Very High
Regional Level	High
Global Level	High

Source: <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports/>, accessed February 10, 2020

13 Cases Confirmed in 6 U.S. States

Source: www.cdc.gov, accessed February 11, 2020

People Under Investigation (PUI) in the United States*†

Positive	12
Negative	318
Pending [§]	68
Total	398

*Cumulative since January 21, 2020.

† Numbers closed out at 7 p.m. the night before reporting.

§Includes specimens received and awaiting testing, as well as specimens in route to CDC.

Number of states and territories with PUI: 37

Source: www.cdc.gov, accessed February 10, 2020

Maryland: 2019-nCoV Cases and PUI

- Number of patients approved for 2019-nCoV testing: 2
- Number of 2019-nCoV tests pending at CDC: 0
- Number of negative 2019-nCoV tests: 2
- Number of laboratory-confirmed 2019-nCoV cases: 0

- Testing and case counts posted at <http://health.maryland.gov/coronavirus>

Data current as of February 11, 2020

Testing for 2019-nCoV

- Testing for 2019-nCoV is still being performed at CDC.

New Triage Poster

Prevent the spread
of 2019 Novel Coronavirus

If you have:

- Fever
- Cough
- Shortness of breath
- Traveled to China in the last 14 days or
- Had contact with someone who has traveled to China in the last 14 days who has been sick

Please immediately tell a staff member
and put on a mask.

New Clinician Poster

Consider 2019 Novel Coronavirus (2019-nCoV)

Symptoms

Does the patient have **any** of the following:

- Fever
- Cough
- Shortness of breath

Exposures

Does the patient have **any** of the following:

- Travel to China within 14 days of illness onset
- Contact with a person with 2019-nCoV

If clinical or exposure history are concerning for 2019-nCoV:

1) Isolate patient: Provide facemask and place in private room (preferably negative pressure); use N95 respirator, gowns, gloves and eye protection to assess patient **AND**

2) Collect information for Persons Under Investigation Form
<https://www.cdc.gov/coronavirus/2019-ncov/downloads/pui-form.pdf>
AND

3) Consult with local health department while patient is still present to discuss 2019 Novel Coronavirus testing

New CDC Guidance for Healthcare Settings Released

Interim U.S. Guidance for Risk Assessment and Public Health Management of Healthcare Personnel with Potential Exposure in a Healthcare Setting to Patients with 2019 Novel Coronavirus (2019-nCoV)

- Details risk classification for asymptomatic healthcare personnel following exposure to patients with 2019-nCoV infection, and monitoring and work restriction recommendations

Source: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html>

Interim US Guidance for Risk Assessment and Public Health Management of Persons with Potential 2019 Novel Coronavirus (2019-nCoV) Exposure in Travel-associated or Community Settings

Updated February 8, 2020

This interim guidance is effective as of February 3, 2020, and does not apply retrospectively to people who have been in China during the previous 14 days and are already in the United States.

CDC has provided separate guidance for [healthcare settings](#).

Monitoring Update

- Current status
- Next steps

2019 nCoV CORONAVIRUS

HEALTH ALERT: *Travelers from China*
There is an outbreak of respiratory illness in China.

Travelers are required to be monitored for up to 14 days after leaving China.

Travelers should stay home and monitor their health within this 14-day period.
A health official will contact you to give additional instructions.

Take your temperature with a thermometer 2 times a day and watch your health.

If you develop a fever (100.4°F/38°C or higher), cough, or have difficulty breathing:

- Call your health department for advice before seeking care.
- If you can't reach your health department, call ahead before going to a doctor's office or emergency room.
- Tell them your symptoms and that you were in China.
