

TICK BITE NOTIFICATION FORM

Please tape tick in box below for identification

Name: _____

Date bitten: _____

Location on body: _____

Place an X in the box next to type of tick found:

To Remove a Tick

- Use fine-tipped tweezers and protect your hands with a tissue or glove.
- Grab the tick close to the skin—do not twist or jerk the tick.
- Gently pull straight up until all parts of the tick are removed.
- Clean the tick bite with soap and water or an antiseptic.
- Wash your hands with soap and water, or an alcohol-based rub.
- Do not use petroleum jelly, a hot match, nail polish or other products to remove ticks.

Quick Tick Tips

- Check for ticks daily and bathe after being in tick habitat.
- Look for ticks in late spring through early fall, when they are most active.
- Many tick-borne diseases have similar early symptoms, including fever, headache, fatigue, and possible rash.
- If untreated, infection may spread from the site of the bite to other parts of the body producing symptoms of Bell's palsy or Erythema Migrans.
- **Contact your health care provider:**
 - to discuss prophylaxis if the tick was attached for at least 24 hours, or
 - if you develop any symptoms after a tick bite or being in tick habitat

Blacklegged Tick (*Ixodes scapularis*)

Lone Star Tick (*Amblyomma americanum*)

Dog Tick (*Dermacentor variabilis*)

Unknown tick species

For tick identification, tape the tick on this form or put it in a baggie and follow directions on the back.

- Tick identification is a free service
- MDA does not offer medical advice
- Ticks are not tested for diseases
