This guide is meant to serve as an outline of programs and services that address many of the needs of cancer patients during treatment planning, as well as resources for loved ones.

All programs and services are (unless otherwise indicated):
- no cost,
- reduced cost based on income, or
- government assistance program.

Patients and providers may use this guide to help navigate through the resources that are currently available to assist patients. In addition to the resources listed, always check with the hospital/treatment center social worker, patient navigator, nurse, or other health care provider for programs and services offered through the hospital.

If a patient is planning to be treated outside of the town or city where the patient resides, the patient should discuss logistics such as lodging options with his or her hospital/treatment center provider team.

For broad information about cancer, contact:

**National Cancer Institute**: [www.cancer.gov](http://www.cancer.gov), 1.800.422.6237

**American Cancer Society***: [www.cancer.org](http://www.cancer.org), 1.888.227.6333

*The American Cancer Society’s toll-free phone number listed above will connect callers with a live resource navigator who can assist with identifying appropriate community resources and answer questions about many of the resources listed below.

**Physical Needs:**

- **Where do I find...?**
  - **Routine Cancer Screening**
    - Check with local hospitals for a schedule of free or low-cost cancer screenings.
    - Check with your insurance provider for covered screenings.
    - Check with local health departments for:
  - **Diagnostic Testing and Planning for Treatment**
    - Discuss with health provider any issues that may interfere with keeping medical appointments and/or following a cancer treatment plan, including transportation, housing, level of independence, other health problems, etc.
