Continuum of Care Services Standard 3.1

Patient navigation in cancer care refers to individualized assistance offered to patients, families, and caregivers to help overcome health care system barriers and facilitate timely access to quality medical and psychosocial care and can occur from prior to a cancer diagnosis through all phases of the cancer experience. The navigation services implemented will depend upon the particular type, severity, and/or complexity of the identified barriers.
Patient Benefits

- Time
- Ability
- No clinical responsibilities
- Accountability
- Accessibility
- Comfort / Stress reduction
